## DETAILED ACTION

### QUAYLE

This application is in condition for allowance except for the following formal matters:

#### *Claim Objections*

Claim 1 is objected to because of the following informalities:

Variable "n" defined as having a value greater than one needs to be more specific since "n=1.01" is also having a value greater than 1. Can "n" be a decimal number?

Variable "m" needs to be defined, see above for proper definition.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

#### *Allowable Subject Matter*

Claim 1 is allowed.

Claim 1 calls for, among others, a loop filter comprises a plurality of integrators (3).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Modgil et al. (5,352,986); Van Den Homberg et al. (6,140,875); Dijkmans et al. (6,300,825); Miao et al. (6,362,683); (Berkhout (6,577,186)) show further analogous prior art circuitry having pulse-width modulation.
